

A+ Science Newsletter, December 2014

"We make a living by what we get, but we make a life by what we give"
Winston Churchill

A+ Science, a CRO run by its employees

Our vision is to become the CRO best known for its unique and dedicated personnel with focus on customer satisfaction. To Earn Trust- Make Difference

Almost a year has gone by since we, the employees at A+ Science, began to run the company. Due to everyone's support and encouragement, we have managed to end this year with positive results and we are very proud of our accomplishment.

With this last newsletter of year 2014, we would like to wish all our readers a wonderful holiday season and a new prosperous and peaceful year. We also hope that 2015 will be a promising year with breakthroughs in the world of clinical research.

The Ebola outbreak in West Africa is one of the deadliest the world has ever seen; a lot of research is needed to end this misery. There is no known cure or preventive vaccine, but early diagnosis and medical attention can increase the chances of survival. Thousands of children are living through the deaths of their mother, father or family members from Ebola. These children urgently need special attention and support; yet many of them feel unwanted and even abandoned. Orphans are usually taken in by a member of the extended family,

but in some communities, the fear surrounding Ebola is becoming stronger than family ties. Instead of sending Christmas cards this year, we have chosen to make a charitable donation to UNICEF and assist children in the ebola affected areas, to make a difference.

Merry Christmas and Happy New Year

We at A+ Science would like to wish all our friends, customers and business partners a wonderful Christmas and holiday season. We look forward to an exciting new year 2015.

We have given a donation to help children in the ebola affected areas.

UNICEF are working around the clock in the ebola affected areas to distribute protective equipment and supplies, training health workers and caring for children and their families.

Thanks to this donation UNICEF can reach even more children affected by the ebola epidemic.
